**Report: TAME Trailblazer Trip – LaMarque and Crosby Middle Schools**  
**November 5-6, 2008**  
*Hosted by Dow Chemical*

Thanks to donations and volunteer support from Dow Chemical, **more than 300 students, volunteers and teachers** were given the unique opportunity to experience the TAME Trailblazer, a 40-foot mobile science and engineering exhibit trailer. The Trailblazer visited LaMarque Middle School in Texas City and Crosby Middle School in Hitchcock.

The Trailblazer is a unique and engaging exhibit that provides hands-on, interactive and memorable experiences that encourage interest in science and engineering. The Trailblazer features 7 exhibit bays showcasing magnetism, aerodynamics, the solar system, weather and the medical sciences.

Dow Chemical volunteers helped the Trailblazer Team introduce students to the wonders of science and engineering. A special thanks to Carol Johnson for coordinating the visits.

Why do students love the Trailblazer?

- “Because it was fun and teaches me more science.”
- “The gyroscope was cool...”
- “the volunteers were very helpful...”
- “It has a lot of hands on activities.”

Together, we make a difference because of the continued efforts of our longtime supporters and active partners such as Dow Chemical Company, Halliburton, IBM, and many others who join us in devoting time and energy to our most important natural resource – our children.

Thank you for your ongoing support.

Sincerely,

A handwritten signature in black ink, reading "Michael Nevels".
