**Report: TAME Trailblazer Trip – University of Texas and Austin Area Schools
November 17, 2007
Hosted by Un Sabado Gigante in Engineering**

Thanks to donations and volunteer support from Un Sabado Gigante in Engineering (USGE), nearly 300 middle school students from the Austin area were given the unique opportunity to experience the TAME Trailblazer, a 40-foot mobile science and engineering exhibit trailer.

Un Sabado Gigante in Engineering is a free one-day program opened to all middle school students in Texas, with a focus on the Hispanic population. USGE is designed to expose and inspire students to the opportunities in Engineering and Science. Its annual Engineering Fair is held at the University of Texas at Austin.

USGE volunteers, Christopher Yen, Lorenzo Saenz, Leticia Reveles, Oliver FASTERLING, Patty Montiel, Rachel Harvey, Jean Dozier and Anthony Tijerina, assisted with the Trailblazer tours and helped introduce the students to the wonders of science and engineering. The Trailblazer Program is designed to enhance science, technology, engineering and math (STEM) learning experiences in the classroom, by providing hands-on interactive science and engineering exhibits in a mobile learning environment.

Together, we make a difference because of the continued efforts of our longtime supporters and active partners such as Un Sabado Gigante in Engineering, the University of Texas at Austin, ConocoPhillips, Shell Oil Company, Dow Chemical Company, IBM, and many others who join us in devoting time and energy to our most important natural resource – our children.

Thank you for your ongoing support.

Sincerely,

A handwritten signature in cursive script that reads "Michael Nevels".

Michael Nevels
