

Join the Next Generation of Texas Engineers!

Curious about a career in engineering?

TAME offers fun - and free - engineering programs for middle and high school students.

ENGINEER SOLUTIONS TO ACHIEVE A BETTER AND MORE SUSTAINABLE FUTURE FOR ALL

Engineering is not only fun – it's essential for solving the world's problems! Student engineers in TAME Clubs will plan, design and build innovative solutions to produce affordable and clean energy throughout the state of Texas. TAME clubs meet regularly, often times after school. Students can participate in TAME's regional engineering competitions each spring, and TAME seniors can apply for our college scholarship program.

All of TAME programs, including clubs and competitions, are offered at no cost to students and families.

HOW DO I SIGN UP?

Your local TAME club leader will provide a link to sign up for your club. TAME clubs require an adult sponsor and are based in schools, libraries and community centers across Texas. Not sure if there is a TAME club in your area? Email programs@tame.org.

At TAME, we celebrate the engineering mindset - not being the smartest one in the room.
